

## Mentoring Minds Total Motivation Math Information

Dear Mitchell Parents,

As I am sure you are aware, our 5<sup>th</sup> and 6<sup>th</sup> grade math standards are quite rigorous. Nearly half of the 5th and 6th grade standards were previous standards from grades 6-9. Because of this, our teachers have searched for materials suitable to teach these expectations. They have discovered that several other intermediate schools are using the "Total Motivation Math" series which has proven to be invaluable. A student copy must be purchased for every child as they are consumable and updated annually. Our teachers feel the materials are exceptional and a must for every child.

When the teachers consulted with other math teachers in our district, they learned the parents helped to fund the cost of the student books. We would like to ask for your help to provide this resource. We realize school supplies can be costly, but we feel by asking you to order your child's book now as opposed to the beginning of the school year when so many other school-related costs are due that it might be more feasible for our families. While the state and district provide a textbook for the adopted textbook series, the textbook series does not include material for all of the standards as the standards were updated after the most recent textbook adoption. We are hoping that during the next math textbook adoption timeframe three years from now, that the Mentoring Minds Total Motivation Math series is adopted for our district. Since this book has what is not included in the state adopted series, our teachers feel it is critical for our students. The total cost of purchasing the book for every child, since it is a consumable book that is updated annually, is cost prohibitive for our campus budget allocation or the Mitchell PTO. I wish we had enough money to purchase it for every child, but that isn't the reality.

We can't thank you enough for your support that will enable us to offer this instructional resource to our students and teachers. I hope you will agree once you see this exceptional book, that it will be a great resource for your child. Your child will be able to keep the book at the end of the school year to use for review and as a reference. In addition, with the purchase of a book for each child, an online option is offered that our teachers currently use with their students.

An online payment option is available at:

<https://conroeisd.schoolcashonline.com/>

Also, if you are able, there is an option online for you to donate the cost of another child's book whose family may not be able to pay the fee.

If you choose not to pay online, please submit a check for \$16.00 made out to: Mitchell Intermediate. Indicate "Math Book" in the Memo section of your check.

***Please order your child's book no later than June 14, 2019.*** Our goal is to order the materials prior to the end of the school year so that the books will be available the first week of school.

Thank you for your support,

Paula Klapesky  
Mitchell Intermediate Principal
